Sitma’s new 11-SAF modules, combining cut sheet feeding, accumulation and folding, allow for the cut sheet accumulation section to be placed before or after the folding module. This feature provides for the accumulation of sheets prior to folding and also allows for individually folded sheets to be accumulated prior to insertion into the envelope. Single or multiple buffer sections can be added as required. A Sitma camera system is also available.
TECHNICAL DATA

Feeding possibilities
Min./Max. length: 100 – 305 mm - 3.93" – 12"
