The new 11-SRT has been designed for a wide range of applications with stitched or perfect bound magazines, catalogues, mailing and newspapers.

Special dual vertical side pushers. This pusher design allows for the highest possible ejection speeds while maintaining excellent bundle integrity.

Operator interface with a touch screen panel for easy set-up of job parameters.

**FEATURES**
- Heavy duty design
- Minimal drop distance
- Extremely reliable
- Quick change over
- Stepper motor drop gate drive
- Minimal maintenance
- Caster mounted (on request)
- Automatic change over (on request)
- JDF compliance option

**SPECIFICATIONS**
- **Product Size:** See Chart
- **Product Thickness:** 1-20mm (0.03”-0.78”)
- **Operating Speed:** Up to 15,000 pph
- **Total Stack Height:** Up to 250mm (9.84”)
- **Infeed Height:** Up to 15,000 pph
- **Delivery Table Height:** Min. 850mm (min. 33.4”)
- **Discharge:** Right, left or straight out
- **Electrical:** 3.4 Kw
- **Air Requirement:** 200L/min @ 6 bar
- **Weight:** 750kg
